

RISK SOLUTIONS

An integrated and practical approach to risk management throughout your organisation

DRIVING IMPROVEMENT

Our Risk Solutions business has an established track record advising international and national businesses on their strategic approach to managing all types of business risk.

Any business will experience exposure to some form of risk which threatens their ability to achieve their objectives. However, by adopting an integrated and practical approach to risk management, based on the identification, assessment and rating of each risk, an organisation can take control of the situation and manage it to their own benefit.

How our team can help you

We recognise that your business will face a complex balancing act between commercial realities, stakeholder demands and increasingly onerous legislative and regulatory requirements.

Our Risk Solutions business delivers strategic risk management and occupational health & safety (OHS) solutions that not only meet these increasing demands but also add value to your organisation. Our clients include both leading corporate organisations and government entities.

At WSP we believe that there are three critical areas that drive improvement in risk management and therefore significant reduction in incidents:

- Technical solutions to specific risk issues
- A management system which provides a framework for reporting and managing risk
- A positive culture with leadership from the top and full engagement in problem solving at all levels of the organisation.

With expertise across all three areas, WSP is able to offer clients an integrated approach that no other consultancy can offer. We will help you engage with your staff and drive positive, practical, business led performance. We combine our cultural change and systems expertise to deliver a unique solution to each of our clients.

Introducing WSP

WSP Risk Solutions is a business division of WSP Environmental Pty Ltd, a leading international environmental and sustainability consulting business.

WSP Environmental has over 1,100 staff based in 65 offices across the world and has a reputation for the delivery of technical excellence, offering commercial and pragmatic advice to our clients. In Australia we have a team of over 100 people providing innovative and commercial solutions to environmental, health and safety and risk related business issues for some of Australia's leading businesses.

WSP Environmental is part of WSP Group plc, a leading international consultancy to the built and natural environment with 10,000 people worldwide.

OUR APPROACH

We act as facilitators and coaches. We engage with people in a business to review their objectives and the factors that influence their ability to meet those objectives. We work with our clients to formulate and implement a tailored strategy and become their trusted advisor.

Strategy, Culture & Systems

Our specialist strategy team works with clients to gain a better understanding of the key drivers of culture and therefore performance. It enables our clients to formulate a strategy to achieve desired outcomes.

We will implement programs that are right for your business, right for your culture and that work on the ground. Our approach is to develop and deliver engaging and interesting programs that teams respond well to.

Our offering includes:

- Integrated culture / climate and systems assessments
- Vision / leadership charter and risk or safety strategy
- Leadership training / coaching
- Employee engagement programs
- Systems development and integration
- Systems and behaviour audit programs
- Incident management
- Total contractor management
- Psychological health
- Business continuity planning

Technical Solutions

With more than 1,000 environmental, health, safety and risk professionals globally, WSP can also provide you with a very broad range of highly specialist knowledge that can be applied to whatever industry or sector you operate in.

Our expertise ranges from asbestos management to product safety; from fire safety audits to expert testimony; from environmental liabilities to future property planning requirements.

WSP's specialists are world leaders and, critically apply their expertise in a pragmatic, commercially-focused manner. Just some of the areas we can help with include:

- Asbestos
- Chemical management
- Confined spaces
- Electrical supply
- Ergonomics
- Fire protection and prevention
- Industrial hygiene, ventilation and indoor air quality
- Litigation and expert testimony
- Plant management
- Project risk management
- Property and facility management
- Public liability and property loss control programs
- Risk assessment and management
- Traffic management
