
Specialist Training in Environmental Management

IEMA Approved Implementation and Internal EMS Auditor Combined Training Course

This course is aimed at those responsible for implementation and management of ISO 14001 compliant systems in any type of organisation. The course also provides the expertise required to manage and conduct an internal EMS audit.

The combined EMS implementation and auditor course has been approved by the Institute of Environmental Management and Assessment (IEMA), and has been designed to meet the practical needs of those implementing or taking over management responsibilities for an EMS. The course provides practical tools and skill-sets for each of the Plan, Do, Check and Act phases of the EMS.

COURSE BENEFITS

This course will enable an organisation to successfully implement or continually improve the performance of an ISO 14001 compliant EMS. In addition, the course provides delegates with the tools and skill-sets to manage and participate in your organisation's EMS auditing programme. After the course delegates will be able to add value to the organisation by ensuring the EMS is designed to continually improve environmental and ethical performance. Delegates will also have a general understanding of systems and practical skills which can be transferred to other systems and standards. Successful delegates can receive up to 12 points towards IEMA registration.

COURSE DELIVERY

The course is run across five days and is a combination of each of the individual three-day courses. The course is practical and participative and includes presentations, syndicate work, case studies, an on-site practice audit exercise and real-life practical illustrations of relevant theory.

We develop our courses tailored to the specific requirements and nature of your organisation and can deliver the training directly to your training audience, no matter how large or small.

OUR TUTORS

Tutors have extensive, multi-sector real world experience in implementing, managing and auditing environmental management systems. Please see our tutor profile at the end of this document for further information.

LEARNING OUTCOMES

- Understand the ISO 14001 standard and how it can be practically applied at your organisation through the Plan, Do, Check, Act cycle
